EFET ECM DOCUMENT STRUCTURE

GENERAL documents:

- **EFET ECM document structure:** Brief explanation of the document structure
- **EFET ECM doc0 - Executive Summary**: This document explains the concept and gives in plain language the goal of the EFET ECM project and its relation to EFET standards.
- **EFET ECM doc1 - Lexicon**: This document contains a lexicon of all special terms or naming conventions used in the ECM documents

EFET STANDARDS documents:

- **EFET ECM doc2 - EFET Standards 1.0 - Central Matching and P2P Authentication Process**: This document the standard PROCESSES that apply for Electronic Trade Confirmations be it through a Central Matching Service or directly via the exchange peer-to-peer of electronic confirmations (referred to as P2P authentication)
- **EFET ECM doc4 - EFET Standards 1.0 - Core Components & Coding Scheme**: Contains the core components and coding scheme that will be relevant to more than the Electronic Confirmation Framework
- **EFET ECM doc5 - EFET Standards 1.0 - ECM Interface Definition**: This document gives the complete definition of the EFET standard ECM Interface and thus the basic business context, workflow, data model, XML structure (DTD and Schemas) and rules.

RECOMMENDATION documents:

- **EFET ECM doc3 - Recommendations for Central Matching Service**: This document is addressed to Central Matching Service Providers and describes the business and technical recommendations for the service to be widely accepted by the EFET members.
  The only REQUIREMENTS towards the Central Matching Service Provider to be labelled "EFET compliant" is the compliancy with the EFET STANDARDS 1.0 as defined in documents 2, 4 & 5.
- **EFET ECM doc6 - Recommendations for EFET box**: This document is addressed to EFET members who want to build their EFET box and gives a high-level business and technical analysis of this application.
  The only REQUIREMENTS towards the EFET box is the compliancy with the EFET STANDARDS 1.0 as defined in documents 2, 4 & 5.
