Unlocking the potential of Ukraine's gas storage and enhancing security of supply with EFET standard contractual solutions

The European Federation of Energy Traders (EFET)\(^1\) continues to provide standard contractual solutions for national gas trading in emerging markets in times of regulatory and political change. The workshop on the Ukrainian customs warehouse regime, which EFET co-hosted with the Ukrainian Storage System Operator Uktransgaz (UTG) yesterday, on 18 May 2021, attracted over 150 participants. It constitutes a testimony to the fruitful cooperation between the European trading community and the gas industry in Ukraine.

EFET standard form documents allow non-Ukrainian market participants to minimise risks under the current regulatory framework, thereby incentivising access to 12 gas storage sites in Ukraine with a total capacity of over 30 bcm and use of the Ukrainian “customs warehouse” regime (CWE). The Ukrainian CWE enables non-resident trading companies to leave gas in storage for over 1095 days without taxes and customs duties.

“After two years of working closely with our Ukrainian partners, it was pleasing to see so much interest in the customs warehouse regime. The efforts of EFET and Uktransgaz play a crucial role in promoting trading, enhancing security of supply and ultimately providing welfare benefits for customers in both Ukraine and the EU. EFET will, of course, continue to work with our partners to foster ongoing reforms in the Ukrainian gas market,” concludes Jan Haizmann, Chair of the EFET Legal Committee.

Through its contractual standardisation arm, EFET facilitates trading through the issuance of tailored EFET documentation, catered for cross-border gas trading and storage warehouse transactions. The EFET master agreements can be used in place of bespoke trading arrangements, enabling effective credit management for OTC transactions with counterparties in Ukraine.

\(^1\) The European Federation of Energy Traders (EFET) promotes competition, transparency and open access in the European energy sector. We build trust in power and gas markets across Europe, so that they may underpin a sustainable and secure energy supply and enable the transition to a carbon neutral economy. We currently represent more than 100 energy trading companies, active in over 27 European countries. For more information: [www.efet.org](http://www.efet.org)
