

EFET – RE-Source Platform

JOINT PRESS RELEASE

16 October 2019

RE-Source Buyers' Toolkit launched featuring the EFET CPPA Master Agreement

The European Federation of Energy Traders (EFET)¹ welcomes the launch of the Renewable Energy Buyers' Toolkit, developed to provide information, raise awareness, and ultimately help buyers enter the market for corporate sourcing of renewable electricity. The tools are designed to unlock the huge potential for corporate sourcing of renewables and make a significant impact for the transition to a low-carbon society.

The toolkit features the standard EFET Corporate Power Purchase Agreement (CPPA). The EFET CPPA represents the first cross-country standard CPPA for Europe, helping to reduce transaction costs and facilitate the negotiation process between the parties involved. This standard CPPA allows for both physical and financial PPAs with the proven Election Sheet approach, which allows for flexible tailoring of the PPA to the needs of the corporate renewable energy buyers. The agreement will be supported by legal opinions in key jurisdictions, as well as translated from English into other EU languages to ensure uptake across Europe.

The toolkit also includes:

- Report on 'Introduction to Corporate Sourcing of Renewable Electricity'
- European Corporate Sourcing Directory
- PPA training academies, provided by Pexapark
- Report on 'Risk Mitigation for Corporate Renewable PPAs' (coming soon)

You may find the link to the toolkit below:
