

Letter addressed to:
Regulators and TSOs in Germany, France, Austria, Italy, Switzerland

Cc: DG TREN, ETSO, and ERGEG secretariat

December 21, 2007

Dear Sirs,

***Maximising the allocation of cross border transmission capacity;
secondary capacity market***

We are pleased to refer you our latest positions on:

- 1. Opportunities for TSOs and Regulators to maximise the allocation of cross border transmission capacity for competitive wholesale power transactions in Central and Southern Europe, including Switzerland, and*
- 2. The importance of a secondary capacity market*

EFET Task Force Switzerland aims to work alongside Swiss public and private organisations to advance the liberalisation process. We hope that these papers will constitute a basis for further discussions and we rely on your support for implementing these views.

We would appreciate the chance to present the main ideas of these positions in the next Stakeholder Group meeting of the Central-South Electricity Regional Initiative.

Yours sincerely,

Jan van Aken

Secretary General
